The purpose of the journal Informing Science is to provide a better understanding of fields that inform their clientele. These fields include information systems, library science, journalism in all its forms, and education. Even though these fields developed separately and are taught across campus, they are evolving into the new discipline of Informing Science.

Informing Science publishes articles that provide insight into how best to inform clients using information technology. Authors may use epistemologies from engineering, computer science, education, psychology, business, anthropology, and such. The ideal paper will serve to inform fellow researchers, perhaps from other fields, of contributions to this problem.

Informing Science is an academically peer reviewed journal. All submissions are blind refereed by three or more peers. Informing Science is published in print by subscription and its articles also appear online free of charge on the web site http://inform.nu

Synthesizing Design and Informing Science Rationales for Driving a Decentralized Generative Knowledge Management Agenda
Ulrich Schmitt, T. Grandon Gill ................................................................. 1-18

Challenges in Designing Curriculum for Trans-Disciplinary Education: On Cases of Designing Concentration on Informing Science and Master Program on Data Science
Dimitar Christozov, Katia Rasheva-Yordanova, Stefka Toleva-Stoimenova ........... 19-30

Ensemble Learning Approach for Clickbait Detection Using Article Headline Features
Dilip Singh Sisodia .......................................................................................... 31-44

The Impact on Public Trust of Image Manipulation in Science
Francisco López-Cantos ................................................................................... 45-53

Training Generalists in Higher Education: Its Theoretical Basis and Prospects
Vladimir Mokiy .................................................................................................. 55-72

International Standard of Transdisciplinary Education and Transdisciplinary Competence
Vladimir Mokiy .................................................................................................. 73-90

Introduction to Series: Informing Science Perspectives on Fake News
Eli Cohen ......................................................................................................... 91-94

Building an Informing Science Model in Light of Fake News
Eli Cohen ......................................................................................................... 95-114

Fake News and Informing Science
Grandon Gill .................................................................................................... 115-136

Deception: Types, Principles, and Tactics
Eli Cohen ......................................................................................................... 137-156

The KGB and Anti-Israel Propaganda Operations
Eli Cohen, Elizabeth Boyd .............................................................................. 157-182
